Journeyman Mochipet is back with an all new full length album. Mochipet's new record is a dazzling mash up of electronic beats combined with some extremely talented folks in the rap community. I like to think I have a wide knowledge of most genres but I have very little of the hip/hop community. But, I know one thing I like what I am hearing here. Mochipet is really making all of these artists pop on the record.

Once, the album gets going it never really slows down or stops. The album just chugs along for twenty tracks not giving you a second to take a break or a breathe. First track "Tangle" features Salva and Epcot and has a darker tone and imagery to the album with thats of references to the apocalypse. "Get Your Whistle Wet" featuring The Hustle Heads is very sensual and sexual song with a grinding beat and some suggestive lyrics. "A Beat Never Forgets" features The Giant Elephants and the strange blend of hip hop makes them a band that you will need to investigate further. "Vnecks" really showcases the wonder of Mochipets work hearing combing such a abstract beat with the Freshest Kids rhythms and having it coming out sounding that hot is a marvel.

The marriage of hip hop and electronic artists needs to happen more. It brings the best out of both genres of music. Any fans of the grindcore and breakbeat and have some interest in the hip hop world this is really cool way to hear some great talents in the scene and to enjoy Mochips brilliant beats.
